

Problem Statement

By – Hemesh Chadalavada

A photograph of a female healthcare professional, likely a nurse or doctor, with dark hair and a warm smile, wearing a light blue striped shirt and a teal stethoscope. She is leaning forward, holding the hand of an elderly male patient with grey hair, who is wearing a light blue button-down shirt. They are in a home setting, with a window and curtains visible in the background. The text "Problem Segment" is overlaid on the image, underlined.

Problem Segment

Health-Care & Wellness at our Homes

PROBLEM:

PHOTO: THINKSTOCK

- Family Doctors play a huge role in the health of all the family members.
- But most of the time, the doctor doesn't even have the proper health reports of the family members.
- This may result in irregular health checkups and abnormal body conditions which may result serious conditions of the person.

PROBLEM:

We should check our health conditions daily to ensure good health & hygiene.

But many people in India don't go for a health-checkup regularly.

This may result in unexpected & Serious disorders like Heart attacks etc.

PROBLEM:

- Many Accidents and Injuries Happen in our homes daily.
- In case of a major injury, a simple treatment should be done at home while waiting for the ambulance, to prevent excess bleeding or serious pain.
- But this may not be possible every time as people lack awareness to do such procedures.
- Many People don't even know what to do in an emergency situation like this.

Thank You!
